4) METHOD OF CONDUCT

It's allowed to work on the whole body as long as the prosthetics are relevant and cover at least 10% of the surface, excluding the headpiece. It is compulsory to have the model wearing a lower underwear garment.

There aren't any technical constraints, therefore it can be used: brushes, sponges, airbrush, mixed techniques, providing that they are suitable techniques to the work achievement. The only constraint is the compulsory use of professional products and cosmetics that do not compromise the safety of the model and of the surrounding environment.

It's not allowed to start any stage of the job before the official start of the contest, however, it is allowed to start the preparation of the working area an hour before the challenge (eg. take out products and prosthetics and set up the station).

Each competitor must provide their own model, which must be 18 years or older. (In case of need you can contact the EffectUs Association to provide for a model if notified in time). The models will have to sign a waiver (penalty the exclusion from the competition).

It is allowed to bring an assistant helping to the realization of the job for the first three hours of work. After those three hours this person will then remain in service only for the maintenance of tools and cleaning the station or for holding brushes and paints, cleaning the airbrush.

- Costume: To complete the characters, it is allowed to wear accessories made previously, providing they don't exclude from processing substantial portions of the body (for example , a mantle is allowed but trousers or leggings are not, because they would preclude work on the legs). The artist or the model must also cater the underwear clothing to wear under the makeup. It is not allowed to make the dressing after the end of the given time.
